Report addresses growing issues of hydrogen embrittlement in offshore environments.-Digital transformation vision enables frontline workers to become agents of change-Petrobras purchases FPSO P-71 and ponders development plan for Tupi-Groundbreaking new app details every energy resource in the North Sea-BP starts gas production from Qattameya field-Siemens Energy to help Total achieve low-emission goals for largest LNG project in Africa-Oil production costs reach new lows boosting deepwater prospects-Petrobras releases highlights on production and sales in 3Q20-FutureOn advances next generation of digital twin solutions for oil and gas-Cyberhawk awarded five-year agreement with major LNG producer in the Middle East

Petroleum Training

About Us

Oil & Gas Portal is a Serintel initiative aiming to diffuse the knowledge of oil and gas sector issues, technologies and innovations between:

- The companies operating in Oil & Gas sector
- The academic institutions
- The young people looking for opportunities to improve specialization or to work in Oil & Gas sector
- The Oil & Gas Research Centers

The project is carried on by Serintel in cooperation with Academic Institutions and International Bodies operating in Oil & Gas sector.

Serintel is an independent Service Company operating on an international scale with expertise in Oil & Gas sector (upstream and downstream) technology transfer.
